Kendall Howard's Small-Form-Factor Wall Mount CPU Brackets are designed to get the computer off the floor and the desktop. The brackets make it easy to secure and mount any small-form-factor PC to the wall or side of the desk. The Velcro strap secures the PC to the bracket.

Everyone needs a CPU bracket to protect their PC. Computers located on the floor are in continual danger of being jostled and kicked, not to mention the difficulty in accessing the drives, ports, and card readers. Desktop computers and PC's that sit on a desk take up valuable work space, look cluttered and unorganized, and run the risk of being damaged by a soda or coffee spill. The Kendall Howard Small-Form-Factor Wall Mount Bracket protects the PC and creates a more functional, organized workspace.

Kendall Howard's Small-Form-Factor Wall Mount CPU Brackets are made in the USA and backed by our Limited Lifetime Warranty.
