

Kendall Howard

3U Component Shelf

Installation Guide

The Kendall Howard 3U Component shelf will mount to any 19 inch EIA-310D compliant racking system. Attach shelf to rack rails with mounting hardware as shown above. (Hardware used is specific to your rack rail system but should be 10-32, 12-24, M5 or M6 hardware)

Note: For devices that may overhang the size of the shelf, the shelf may be mounted upside down and will not loose any of its weight capacity.
